EARS FOR RACK MOUNTING

FRONT PANEL
WITH ESTOP AND
NETWORK CONNECTIONS

Function:

The AIC-142x is an essential sub-system controller of the NEXUS system, sequencing up to 10 discreet field devices, delivering an excellent performance every show. Each SSC translates the cue sequences of the console into an executable command structure that it distributes to its set of drives, while also monitoring for errors. This allows the NEXUS system to be easily scalable, to match the needs of the production. The NEXUS AIC-142x.

SYSTEM:
NEXUS
COMPONENT:
AIC-142x
