CAPACITY (CWA):	5000LBS
CAPACITY (DEAD HAUL):	750LBS
STANDARD GEARING:	75 IPS

Function:

The DELTA is our workhorse. A 3.05kW synchronous gearmotor powers this winch, with a dead haul capacity of 750lbs, yet small enough to fit in the t-bar of an 8" center house. On its side, it fits within a 10" show deck, and can pull a 10,000lb wagon with ease. Standard assembly is zero fleet, but a simple adapter allows it to be used with a tandem endless loop. Powerful, modular, complete theatrical winch that can power any performance. The ETF DELTA.
